EXPERIENCE

StaffRoom AI

Emeryville, CA

Founder & AI Solutions Consultant

October 2023 - Present

- Sold the engagements and built the workflows those sales ran on: discovery notes, SOWs, and the automations that turn a conversation into scoped work. Book of business up to \$18K.
- Choose what to build versus what to leave manual. One pre-sales assessment workflow cut processing time 98% and the client's team now extends it themselves.
- Designed a content system and enabled the operators running it. Agency production volume increased 10x after the workflow went live.
- Write the code: Python, TypeScript, SQL, n8n, REST, and webhooks. Claude Code is how I iterate on internal tools and on the customer's workflow in the same week.
- Instrument the outcome. An ingestion rebuild moved throughput 99.8% in four months and cost down 86%, against a baseline taken before the change.
- Read customer conversations for the repeated job, then turn that pattern into a workflow the next seller or operator can run without me.
- Set up prompts, review gates, and a 95% human-agreement bar, plus EZ-AI training so the people running the workflow can judge the output.

IBM

Austin, TX

Data Engineer / Cognitive Software Engineer, Customer Support

August 2018 - December 2020

- Built the operational dashboards (Tableau, Cognos) leadership used to see which issues repeated, and IBMLogAnalyze, which removed 1-3 hours of prep before anyone could act.
- Shipped DRE Bot into Slack so support engineers got a past-case answer in the tool they already had open, after Design Thinking sessions on what they would actually click.

Wiz Music

Barcelona

Community Development Intern

May 2022 - July 2022

- Pulled the community's own analytics, split joins by source, and showed that reported growth was not organic. Raised the finding instead of adding another campaign on top of it.

EDUCATION

University of Colorado Boulder

Boulder, CO

B.S. Information Science; Major GPA 3.7 | Certificate of Cognitive Science; Dean's List

August 2018 - May 2023

IBM

Online

Systems & Solutions Architecture Professional Certificate (in progress)

expected July 2026

- BPMN, process improvement, and systems design: how a GTM workflow should be drawn before it is automated.

SKILLS

GTM systems: internal tools, workflow automation, API integrations, usage-to-action loops, enablement for sellers and operators. **Build:** Python, SQL, TypeScript, n8n, Claude Code, MCP, Claude / OpenAI / Gemini APIs.
