WORK EXPERIENCE

Staff Room AI

AI Consultant

Oct. 2023 – Present

Client Work

MediaMark Spotlight — LLM-as-a-Judge Content Evaluation System

- Architected multi-phase engagement: data extraction → rubric design → validation → deployment with 95% human-agreement success criteria
- Delivered automated content scoring at scale with triple-gate approval workflows and GitHub-versioned rubrics
- Managed stakeholder communication and requirements gathering, translating business needs into technical architecture
- Built reusable patterns: n8n orchestration, multimodal evaluation, event-driven agent workflows

Allies Against Slavery — Data Platform Modernization

- Modernized data ingestion process, increasing potential throughput by **99.8%** in 4 months and reducing cost by **86%**
- Built data platforms and partnerships to accelerate solutions to human trafficking

I use **Python, Azure AI Services, PostgreSQL, Dropbox API, OpenAI API, n8n, Docker, GitHub Actions**

Wiz Music

Barcelona

Community Development Intern

May 2022 – July 2022

- This study abroad style internship inspired a greater appreciation for diversity for cultures and thought. During these three months I dove into the Web3 community in Barcelona and fostered/supported the Discord community around Wiz music. Working under Marc Collado taught me invaluable lessons in product design and development as well as a few in Spanish and Catalan.
- I used **Spanish, Discord, Twitter (X)**

Valhalla Healthcare

Machine Learning Engineer

May 2021 – Aug. 2021

- Researched, designed and built a machine learning model that added business value by augmenting the capabilities of healthcare providers by translating hand-written notes to an extensible data model across the business.
- I used **Python, Keras, Tensorflow, Docker**

IBM

Cognitive Software Engineer

Aug. 2017 – Dec. 2020

- Designed, built and integrated a machine learning application into Slack that allowed support engineers to find similar service records, accelerating time to resolution and employee productivity
- Published release notes and documentation to stakeholders to support ongoing application development

IBM

Data Engineer

Aug. 2018 – Aug. 2020

- Designed, built, and deployed a data platform for advanced analytics, automating hours of work for support teams.
- Hosted design meetings with stakeholders to discover human priorities for the technology

IBM

Research Intern

May 2017 – Aug. 2017

- Developed a VR local multiplayer tower defense game in Unity using C#. There was a special emphasis on the interaction between players inside and outside of the virtual space.
- Designed and built an engaging AR window exhibit for the ThinkLab using Java and the Microsoft Kinect.
- I used **Kinect, HTC Vive, Microsoft HoloLens, Unity 3D, C#, Python, SQLITE, Flask, Dash, Plotly,**

EDUCATION

"I never let my schooling get in the way of my education." — Mark Twain

University of Colorado, Boulder

B.S. Information Science Graduate, May 2023 — GPA: 3.7 — Projects Inside

University of Colorado, Boulder

Certificate of Cognitive Science, May 2023

IBM on Coursera

Systems and Solutions Architecture, August 2026

Deeplearning.ai on Coursera

Deep Learning Specialization, Jan 2021

Deeplearning.ai on Coursera

Tensorflow Developer Professional Certificate, May 2020

OTHER INTERESTS

RC Health Services EMS Academy

Emergency Medical Technician, May 2024

Post-graduation I wanted to keep learning and I wanted to challenge myself to learn more about a field that is steeped in complexity while remaining widely applicable. Healthcare was my answer.

Bondi Outdoor Leadership

AIARE 1 Avalanche Safety and Rescue, March 2022

The outdoors inspire me, skiing motivates me. Combining the two safely with a sprinkling of science is right up my alley
