EXPERIENCE

StaffRoom AI

Emeryville, CA

Founder & AI Solutions Consultant

October 2023 - Present

- Ran SME interviews, document review, and system mapping, then wrote the product spec for what to automate.
- Built AI agents in Python and n8n, with Claude Code as the daily driver: API integrations, retrieval over client documents, and structured outputs into the tools those teams already used.
- Designed prompt and rubric evaluation from the client's ground truth, then QA-tested it with their reviewers. Held rollout until reviewer agreement reached 95% on labeled examples.
- Automated an IT MSP's pre-sales risk assessments and trained their team to extend the workflow. Processing time fell 98% against a measured baseline from the manual review.
- Modernized a data-ingestion pipeline. Throughput increased 99.8% in four months and operating cost fell 86%.
- Ingested federal case documents for an anti-trafficking nonprofit and scaled data-entry throughput with LLMs, then built the operating dashboard the team used to review incoming cases.
- Designed a Notion content system and enabled the operators. Production volume increased 10x for agency clients.

Wiz Music

Barcelona, Spain

Community Development Intern

May 2022 - July 2022

- Diagnosed Discord analytics by tenure and join source, showed that reported membership growth was not organic, and raised it with the team instead of automating the vanity metric.

Valhalla Healthcare

Remote

Machine Learning Engineer (Intern)

May 2021 - August 2021

- Turned a messy internship into a working model: handwritten clinical notes to a structured data model (Python, TensorFlow, F1 80.03) on a single customer interface during that build.

IBM

Austin, TX

Data Engineer / Cognitive Software Engineer, Customer Support

August 2018 - December 2020

- Built DRE Bot, a Watson NLP Slack app that retrieved similar past cases for support engineers. That cut the most common issues from a multi-touch case down to a single response.
- Deployed IBMLogAnalyze, an internal pipeline and dashboard that removed 1-3 hours of log-prep per case, plus Tableau and Cognos dashboards for C-level reviews of support operations.

EDUCATION

University of Colorado Boulder

Boulder, CO

B.S. Information Science; Major GPA 3.7 | Certificate of Cognitive Science; Dean's List

August 2018 - May 2023

IBM

Online

Systems & Solutions Architecture Professional Certificate (in progress)

2026

- Completed Business Process Modeling (April 2026) and IT Systems Design and Analysis. Cloud Native, DevOps, and Agile coursework is done. The certificate is still in progress.

LEADERSHIP

Executive Council, Alpha Phi Delta, CU Boulder (January 2019-December 2021). As Rush Chair, hosted rush events, built recruitment profiles, and converted prospects to signed bids. Team Lead, AI Tinkerers SF hackathon (October 2025): built the Graph-RAG agent and wired Claude Code as the interactive agent.

SKILLS

Discovery & delivery: SME interviews, document review, system mapping, product specs, QA with client reviewers, rollout, productivity and ROI measurement, Agile (GitHub, Notion). **Build:** Python, TypeScript/JavaScript, SQL, APIs, workflow automation (n8n), internal tools, LLMs, NLP, agents, retrieval, structured outputs, prompt design, AI evaluation, dashboards (Tableau, Cognos), and Claude Code for daily prototyping.
