EXPERIENCE

StaffRoom AI Emeryville, CA
Founder & AI Solutions Consultant October 2023 - Present

- Lead consultative discovery with operators: map current-state workflows, pain, stakeholders, technical constraints, unknowns, and the practical future state before selecting tools.
- Translate ambiguous goals into process maps, prioritized requirements, solution architectures, implementation plans, human review points, and measurable success criteria.
- Built a Notion content-marketing system that increased agency production volume 10x; designed the data architecture, process maps, migration plan, and user adoption training.
- Automated an IT MSP's pre-sales risk assessments and trained the team to operate and extend the workflow. Processing time fell 98% against a measured baseline.
- Ran a 30-day AI-workflow pilot with four users; converted eight-plus sessions into a prioritized product backlog, then shipped one-click generation, multi-draft output, research integration, and direct publishing.
- Built production Notion API integrations in TypeScript and Python: OAuth Connections, data sources, pages, comments, webhooks, and a Whisper-to-Notion pipeline with live-connectivity CI.
- Design Notion as the work and review surface while specialized systems retain their machinery; connect the boundary with APIs, n8n, MCP, and event-driven agent workflows.

Wiz Music Barcelona, Spain
Community Development Intern May 2022 - July 2022

- Analyzed Discord churn and acquisition to define the growth objective, then configured artist feeds and ran an AMA against the engagement gap.

Valhalla Healthcare Remote
Machine Learning Engineer Intern May 2021 - August 2021

- Translated handwritten clinical notes into an extensible data model with Python and TensorFlow, achieving F1 80.03.

IBM Austin, TX
Data Engineer / Cognitive Software Engineer, Customer Support August 2018 - December 2020

- Built DRE Bot after Design Thinking discovery with support stakeholders. At the three-month check-in, teams still used the Watson NLP Slack app and resolved common issues in one response.
- Designed and deployed IBMLogAnalyze, a GDPR-compliant client-data pipeline and dashboard that eliminated 1–3 hours of preparation per case; a user confirmed continued use six years later.
- Built C-level Tableau and Cognos dashboards; published release notes and documentation for each product change.

EDUCATION

University of Colorado Boulder Boulder, CO
B.S. Information Science; Major GPA 3.7 | *Certificate of Cognitive Science; Dean's List* August 2018 - May 2023

IBM | Systems & Solutions Architecture Professional Certificate 2026
RC Health Services | Emergency Medical Technician (NREMT) 2024
Bondi Outdoor Leadership | AIARE 1 Avalanche Safety and Rescue 2022
DeepLearning.AI | Deep Learning Specialization 2021
DeepLearning.AI | TensorFlow Developer Professional Certificate 2020

SKILLS

Discovery & delivery: current-state mapping, requirements, solution architecture, success criteria, SOWs, change management, stakeholder alignment, enablement, launch planning, handoff.

Notion & AI: workspace and data architecture, permissions, API, OAuth, MCP, agents, automations, Claude Code.

Adoption & product: human-in-the-loop design, user testing, product backlogs, operational KPIs, training, documentation.

Implementation: Python, TypeScript, SQL, n8n, REST/JSON APIs, data pipelines, Docker, Git/GitHub.
