

Ethan Zaruba-Walker

Emeryville, CA

📞 (512) 694-4844 • ✉️ ethan@staffroomai.com • [LinkedIn](#)

Experienced software consultant with 8 years building developer tools and the business systems around them. Leading discovery with business owners and technical operators, translating workflow friction into product requirements for engineering. Shipping 12+ OAuth integrations, MCP servers, webhook services, and agentic systems in TypeScript and Python. Developed system documentation and an AI-adoption curriculum delivered to industry professionals.

Core Capabilities

- **Requirements elicitation** → **product learning**: discovery interviews, Design Thinking, workflow mapping, structured feedback loops, backlog definition, and stakeholder alignment
- **Developer experience & content**: API documentation, release notes, quickstarts, tutorials, sample apps, and reference integrations
- **AI, MCP & platform engineering**: MCP servers, webhooks, REST APIs, TypeScript / Next.js, Python, PostgreSQL, n8n, and agentic systems
- **Developer enablement & adoption**: technical onboarding, implementation support, AI-adoption curricula, workshops, and measurement of workflow outcomes
- **Community & partner programs**: technical gatherings, AMAs, multilingual community operations, and embedded delivery with account stakeholders

Professional Experience

- **StaffRoom AI** **Emeryville, CA (remote)**
Founder & AI Solutions Consultant *2023–Present*
 - Lead client discovery and process-mapping sessions to identify workflow friction, model information flows, prioritize automation opportunities, and turn stakeholder evidence into implementation backlogs
 - Train technical and non-technical client teams to adopt Claude, Claude Code, and custom agent workflows
 - Build human-in-the-loop agentic systems with MCP and multi-step automation for client workflows
 - Contribute to the Notion developer ecosystem: production integrations (a public OAuth connection, webhook and worker services, and a Whisper-to-Notion transcription pipeline with CI that tests live API connectivity) and developer-facing assets (an OAuth quickstart, sample Notion Worker, technical guide to the 2025 data-sources API migration, and reusable templates for data-backed applications)
- **Wiz Music** **Barcelona, Spain**
Community Development Intern *2022*
 - Analyzed Discord churn, tenure, and acquisition-source data; identified inorganic membership growth and instrumented the acquisition funnel
 - Ran an artist AMA and configured artist content feeds across English, Spanish, and Catalan community operations, seeing an uptick in community engagement
 - Built Python web-scraping automation to streamline artist and investor outreach
- **Valhalla Healthcare** **Remote**
Machine Learning Engineer Intern *2021*
 - Researched, designed, and shipped a machine-learning model that translated handwritten clinical notes into an extensible data model, achieving an F1 score of 80.03 (Python, Keras, TensorFlow, Docker)

- **IBM** **Austin, TX**
Data Engineer / Cognitive Software Engineer *2018–2020*
 - Built a Watson NLP-powered Slack application that surfaced similar historical cases to support engineers and reduced resolution of common issues to a single response; deployed on IBM Cloud
 - Designed and deployed IBMLogAnalyze, combining GDPR-compliant data pipelines with an analytics dashboard to eliminate 1–3 hours of log-analysis preparation per case
 - Led Design Thinking sessions to elicit stakeholder needs and translate them into shipped tools and executive BI dashboards
 - Authored release notes and product documentation that guided stakeholders through ongoing application changes
- **IBM** **Austin, TX**
Research Intern, ThinkLab *2017*
 - Built VR/AR prototypes and interactive demonstrations using Unity, C#, Kinect, and HoloLens for IBM ThinkLab research exhibits

Leadership & Community

- **Rush Chair, Alpha Phi Delta:** owned the chapter's membership funnel from recruitment events hosting hundreds of prospects and matching them with members to convert into signed bids
- **Hackathon for Racial Justice, IBM:** led the team's data-science work to a second-place finish (2020)

Education & Certifications

- **University of Colorado Boulder** **Boulder, CO**
B.S. Information Science *2018–2023*
 Major GPA 3.7 · Certificate of Cognitive Science · Dean's List (Fall 2019, Spring 2023)
- **IBM Systems & Solutions Architecture Professional Certificate:** in progress (coursework complete; capstone underway)
- **DeepLearning.AI / Coursera**
Deep Learning Specialization & TensorFlow Developer Professional Certificate *2020–2021*
