EXPERIENCE

StaffRoom AI

Founder & AI Solutions Consultant

Emeryville, CA

October 2023 - Present

- Map workflows, files, data, and systems as process diagrams. Write the functional specifications that name which multi-step tasks to automate and which systems the build has to touch.
- Automated an IT MSP's pre-sales cybersecurity risk assessments and trained their team to run and extend the workflow. Processing time fell 98% against a measured baseline.
- Built production API integrations in Python and TypeScript: a public OAuth app, a comments-polling service, and a Whisper-to-Notion pipeline with CI that tests live third-party API connectivity.
- Shipped agentic LLM workflows into production for clients: Claude, OpenAI, and Gemini tool-calling, MCP servers, and Claude Code as the daily driver, with n8n orchestration where the operating team needed it.
- Modernized a data-ingestion pipeline. Throughput increased 99.8% in four months and cost fell 86%.
- Designed a content-scoring evaluation from the client's own ground truth and ran it through their review gates. The pass bar was 95% agreement with human reviewers.
- Built Python data pipelines that ingested federal case documents for an anti-trafficking nonprofit. The output powered a client-facing analytics dashboard the operators used.
- After launch I stay with the team. I resolve user issues, keep a living product backlog, report measured results, and ship the next change in Python and Claude Code.

Wiz Music

Community Development Intern

Barcelona, Spain

May 2022 - July 2022

- Diagnosed the Discord community from its own analytics: segmented churn by tenure and joins by source, identified that reported membership growth was not organic, and raised it with the team.

Valhalla Healthcare

Machine Learning Engineer (Intern)

Remote

May 2021 - August 2021

- Built an ML model translating handwritten clinical notes into an extensible data model (Python, Keras, TensorFlow, Docker), F1 80.03, a human-in-the-loop workflow over unstructured documents.

IBM

Data Engineer / Cognitive Software Engineer, Customer Support

Austin, TX

August 2018 - December 2020

- Built DRE Bot, a Watson NLP Slack app that surfaced similar past cases to support engineers in the channel they already used, cutting the most common issues from a multi-touch case to a single response.
- Designed and deployed IBMLogAnalyze, a GDPR-compliant data pipeline and analytics dashboard. Cut per-case log-analysis prep from 1-3 hours to zero.
- Built a Flask service for in-place log processing at large scale, launched Tableau and Cognos dashboards for C-level operators, and authored the release notes that walked stakeholders through each change.

EDUCATION

University of Colorado Boulder

B.S. Information Science; Major GPA 3.7 | Certificate of Cognitive Science; Dean's List

Boulder, CO

August 2018 - May 2023

IBM

Systems & Solutions Architecture Professional Certificate (in progress)

Online

expected July 2026

DeepLearning.AI

Deep Learning Specialization | TensorFlow Developer Professional Certificate

Online

2020 - 2021

SKILLS

Customer delivery: process mapping, functional specifications, customer discovery, field iteration, enablement.

Python & agents: Python (7+ yrs professional), Claude / OpenAI / Gemini APIs, MCP, Claude Code, n8n.

Systems: TypeScript, Next.js, React, Flask, REST/OAuth APIs, PostgreSQL, Docker, data pipelines.

Analytics & cloud: Tableau, Cognos, GitHub Actions, IBM Cloud, Azure, AWS, GCP.
