EXPERIENCE

StaffRoom AI

Founder & AI Solutions Consultant

Emeryville, CA

October 2023 - Present

- Interview operators, parse existing documentation, and map present-day workflows, files, data, and systems as process diagrams. Write the functional specifications the build follows.
- Automated an IT MSP's pre-sales cybersecurity risk assessments and trained their team to run and extend the workflow. Processing time fell 98% against a measured baseline.
- Designed a Notion-based content-marketing system and enabled the people running it. Production volume increased 10x for agency clients.
- Modernized a data-ingestion pipeline. Throughput increased 99.8% in four months and cost fell 86%.
- Designed a content-scoring evaluation from the client's own ground truth and tested it with a sample of their users through their review gates. The pass bar was 95% agreement with human reviewers.
- Delivered EZ-AI, problem-first AI-fluency training for domain experts, so the people who own the process can judge and extend the system themselves.
- After launch I stay with the team: resolve user issues, keep a living product backlog, report measured results, and prototype (Python, n8n, Claude Code) when it clarifies the next change.

Wiz Music

Community Development Intern

Barcelona, Spain

May 2022 - July 2022

- Diagnosed the Discord community from its own analytics: segmented churn by tenure and joins by source, identified that reported membership growth was not organic, and raised it with the team.

Valhalla Healthcare

Machine Learning Engineer (Intern)

Remote

May 2021 - August 2021

- Built an ML model translating handwritten clinical notes into an extensible data model (F1 80.03), a human-in-the-loop workflow over unstructured healthcare documents.

IBM

Data Engineer / Cognitive Software Engineer, Customer Support

Austin, TX

August 2018 - December 2020

- Led cross-functional Design Thinking discovery sessions to surface business needs, and authored the release notes and product documentation that walked stakeholders through each application change.
- Designed and deployed IBMLogAnalyze, a GDPR-compliant data pipeline and analytics dashboard that eliminated 1-3 hours of per-case log-analysis prep; launched BI dashboards (Tableau, Cognos) delivering operational insight to C-level executives.
- Built DRE Bot, a Watson NLP Slack app that surfaced similar past cases to support engineers in the channel they already used, cutting the most common issues from a multi-touch case to a single response.

EDUCATION

University of Colorado Boulder

B.S. Information Science; Major GPA 3.7 | Certificate of Cognitive Science; Dean's List

Boulder, CO

August 2018 - May 2023

IBM

Systems & Solutions Architecture Professional Certificate (in progress)

Online

expected July 2026

- Completed Business Process Modeling, Analysis and Improvement (April 2026); IT Systems Design and Analysis; Cloud Native, DevOps, Agile.

DeepLearning.AI

Deep Learning Specialization | TensorFlow Developer Professional Certificate

Online

2020 - 2021

SKILLS

Discovery & delivery: process diagrams (Figma, BPMN), functional specifications, client meetings, testing new features with real users and measuring the results, user training, living product backlogs, Agile (GitHub, Notion). **Build & analysis:** Python, SQL, n8n, Claude Code, Tableau, Cognos, human-in-the-loop AI/ML workflows.
