Deloitte
Salt Lake City, UT

Dear Deloitte hiring team:

I am writing to express my strong interest in the Data Analyst position at Deloitte. With a proven track record in implementing AI and machine learning algorithms, I am confident in my ability to contribute effectively to your team.

While consulting through my own LLC, I led the implementation of AI and machine learning algorithms, resulting in an 86% cost reduction in 2 months. Additionally, I scaled up data entry procedures, leading to a 99.8% increase in data entry throughput the following months. These experiences have honed my ability to leverage advancements in technology to drive efficiency and productivity.

My role as a Machine Learning Engineer at Valhalla Healthcare further equipped me with the skills to create AI models focused on explainability and regulatory compliance. Leveraging SQL and Python, I achieved state-of-the-art performance, demonstrating my proficiency in data analysis and model development.

At IBM, I accelerated employee productivity by 20% through the design and integration of a machine learning application into Slack. My experience in automating support ticket workflows and leading design sessions to promote stakeholder alignment has equipped me with a holistic understanding of data analysis and process optimization.

I am particularly drawn to Deloitte's commitment to innovation and excellence in data analysis. I am eager to bring my expertise in AI implementation, data analysis, and process optimization to your team.

Thank you for considering my application. I am looking forward to the possibility of contributing to Deloitte's continued success as a Data Analyst.

Sincerely,

Ethan Zaruba-Walker
