## Contact

+1 (512) 694-4844  
[e.z.walker99@gmail.com](mailto:e.z.walker99@gmail.com)

## Education

University of Colorado,  
Boulder, Colorado  
B.S. Information Science,  
Cognitive Science  
certificate  
Graduated May 2023

## Hard Skills

Python (12yrs, 7yrs pro)  
API creation and integration  
AI Modeling  
Flask  
PostgreSQL  
Tableau  
Cloud services  
Docker/Kubernetes  
Git  
TensorFlow  
SciKit-Learn  
pyDantic

## Soft Skills

Communication  
Problem-Solving  
Analytics  
Collaboration  
Organization

## Interests

Tennis  
Psychology  
Sailing  
Skiing  
EMT

## Summary

Versatile Python developer with 7+ years of experience specializing in Flask microservices and backend development. Experienced at building AI applications that support human workflows with a human-in-the-loop approach. Skilled at translating complex client requirements into scalable, maintainable applications and process mapping that drives business value.

## Experience

### **October 2023 – Present**

#### **AI Consultant • Owner • Zaruba-Walker Consulting**

- Conducting thorough process mapping and discovery to identify potential for AI automation
- Building AI powered business systems to support employee workflows
- Developed a document parsing pipeline to automate data ingestion for Allies Against Slavery (501c3) increasing throughput by 98%

### **May 2022 – August 2022**

#### **NFT Community Manager • Intern • Wiz Music Inc.**

- Engineered Python automation scripts to streamline investor outreach

### **May 2021 – August 2021**

#### **Machine Learning Engineer • Intern • Valhalla Healthcare Inc.**

- Researched, designed and built a machine learning model that augmented the capabilities of healthcare providers by translating hand-written notes to an extensible data model across the business

### **August 2018 – December 2020**

#### **Data Engineer • Customer Support • IBM**

- Designed, built, and deployed a SQL-based data platform for advanced analytics, automating hours of work for support teams
- Developed a Flask-based distributed system for processing and analyzing log files in-place, optimizing performance at large-scale data operations
- Designed, built, and integrated a scalable machine learning application into Slack that accelerated time to resolution

## Relevant Projects

### **June 2020**

#### **Team Lead / Data Scientist • Hackathon for racial justice (2<sup>nd</sup> Place) • IBM**

- Recruited a team of fellow interns, facilitated goal-oriented conversation
- Aggregated and analyzed data from diverse sources, investigated patterns in the data and presented a compelling data-driven story to the team, professional mentors and executive judges using Tableau and Power Point

### **January 2019 – December 2021**

#### **Executive Council • Alpha Phi Delta Fraternity • CU Boulder**

- Established internal reporting and records protocols to ensure best practices
- Key initiatives included academic records, recruitment profiles and work order RFPs and responses
