

Ethan Zaruba-Walker (IBM Client Eng. — Horizon Market)

✉ ethan@staffroomai.com • ☎ (512) 694-4844 • 📍 Emeryville, CA

Builder-seller: ex-IBM data & AI engineer who runs discovery with stakeholders and ships working pilots fast. Now bringing 3 years of AI consulting experience back to IBM.

Skills

- **Discovery & qualification:** active listening, requirements analysis, stakeholder management & change enablement
- **Data & AI:** SQL + Cypher (graph) databases, Python, Watson NLP/NLU, Claude/OpenAI/Gemini APIs; data modeling
- **Analytics & reporting:** Cognos Analytics, Tableau, executive dashboarding
- **Delivery:** REST APIs, automation (n8n), containerized deployment on IBM Cloud, Azure, AWS, Google Cloud
- Change management & stakeholder engagement
- Tools: Watson NLP/NLU, Cognos Analytics, IBM Cloud, Slack API, SQL, Python, Notion, n8n

StaffRoom AI

AI Consulting building Autonomous Enterprises

Oct. 2023 → Present

I use **Python, Azure AI Services, PostgreSQL, Vercel, Claude/OpenAI/Gemini APIs, n8n, Docker**

Sell and deliver every engagement end-to-end — discovery contracts, SOWs, and milestone-gated delivery for clients up to \$18K

Marketing Agencies

- Led end-to-end discovery, design, and implementation of a Notion-based content marketing system to **10x production volume** agency clients, including data and workflow architecture, stakeholder enablement, and change management

IT Managed Service Provider

- Automated cybersecurity risk assessments in preparation for sales calls; streamlining and personalizing pre-sale assets by **reducing processing time by 98%**.
- Managed stakeholder communication and requirements elicitation, translating business requirements into clear technical solutions and documented rollout plans

Data Analytics Platform

- Modernized data ingestion process, increasing potential throughput by **99.8%** in 4 months and reducing cost by **86%**
- Built data platforms and partnerships to accelerate solutions to human trafficking

Valhalla Healthcare

Machine Learning Engineer  **Auto-Note**  

May 2021 → Aug. 2021

I used **Python, Keras, Tensorflow, Docker**

Researched, designed and built a machine learning model that translated hand-written notes to an extensible data model across the business achieving a once-state-of-the-art **F1 score of 80.028**.

IBM

Cognitive Software Engineer **Solve Analytics**

Aug. 2017 → Dec. 2020

I used **Kinect, HTC Vive, Microsoft HoloLens, Unity 3D, C#, Python, SQL/SQLite, Flask, Dash, Plotly**

- Built **DR. Bot**, a Watson NLP-powered Slack app that surfaced past cases to customer support engineers, cutting time-to-resolution for the most common issues to a single response, per 3-month team check-ins. Containerized deployment on IBM Cloud
- Published release notes and documentation to stakeholders to support ongoing application development

Data Engineer ,

Aug. 2018 → Aug. 2020

- Designed and deployed **IBMLogAnalyze**: GDPR-compliant client-data pipelines + the analytics dashboard, eliminating support engineers' log-analysis prep time from 1-3 hours to 0.
- Led collaborative design sessions with stakeholders to identify business needs and communicate complex technical solutions clearly

Research Intern

May 2017 → Aug. 2017

- Built VR and AR prototypes (Unity, C#, Java, Microsoft Kinect) for IBM ThinkLab exhibits and research demos

Education

University of Colorado, Boulder

▼ — B.S. Information Science Graduate, May 2023 — GPA: 3.7 — Projects Inside

 Gamifying Outdoor Education in Software

▼ — Certificate of Cognitive Science, May 2023 —

IBM Systems and Solutions Architecture Professional Certificate

In progress — expected completion: July 2026

▼ — IT Systems Design and Analysis, March 2026 —

▼ — Business Process Modeling, Analysis and Improvement, April 2026 —

▼ — Cloud Native, DevOps, Agile, May 2026 —

AI & ML

▼ — Deeplearning.ai on Coursera, Jan 2021 —

▼ — Tensorflow Developer Professional Certificate on Coursera, May 2020 —

Other Interests

▼ — Emergency Medical Technician, May 2024 —

Post-graduation I wanted to keep learning and I wanted to challenge myself to learn more about a field that is steeped in complexity while remaining widely applicable. Healthcare was my answer.

▼ — AIARE 1 Avalanche Safety and Rescue, March 2022 —

The outdoors inspire me, skiing motivates me. Combining the two safely with a sprinkling of science is right up my alley
